

**Keira Sorrells,
Founder & Executive Director, NICU Parent Network, Co-Chair FCC Taskforce, mom to 25-
weeker triplets, Avery, Lily, and Zoe**

Since 2010, as Founder and Executive Director of the NICU Parent Network, Keira Sorrells has tirelessly worked to elevate the NICU Parent Leader as a professional in maternal infant health. After giving birth to triplets at just 25 weeks 5 days gestation and losing one of her daughters at 14 months old, Keira was propelled into maternal infant health out of an unshakeable desire to ensure no parent experiences the trauma of a NICU stay or loss alone. Together, with a dedicated team of NICU Parent Leaders, Keira has grown the NICU Parent Network to over 40 support organization members across 28 states and 3 countries. NPN continues to be a sought-after resource and collaborative partner for providers, researchers, industry, and other stakeholders in this niche of healthcare.

Parents are the key stakeholders and the key informants in maternal infant health. Nowhere else in healthcare is this more important than in matters related to neonates, a patient population that cannot speak for itself. Keira is passionate about uplifting and strengthening the NICU Parent Leader community so that every aspect of maternal infant health will be improved through informing product development, research protocols, standards of care, family support, and educating communities and healthcare partners resulting in families who thrive. Ms. Sorrells' commitment to authentic leadership and collaboration has successfully established a unified representation for NICU parents everywhere.
